

AFSC T-Shirt Crystal Information

Materials:

- 1 BLACK knit shirt any style with no buttons or openings in the front.
 - **Alternative:** Try a white shirt.
- 1 gross of 20ss Swarovski **BLUE ZIRCON** crystals for the **boot**.
 - **Alternative:** To match the new club jackets, use either SKY BLUE or TURQUOISE AB.
- 1 gross of 20ss Swarovski **CLEAR** crystals for the **blade**, “**AFSC**”, the “**lace holes**” (**8**), and the “**boot hooks**” (**3**).
- Transfer paper (LIGHT COLOR).
- Gem Tac or other jewel glue.

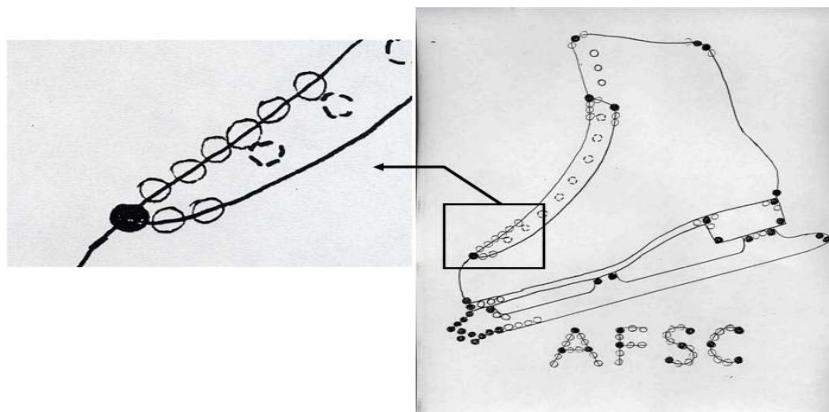

Transfer **the lines** of the pattern and the **TOE PICK CRYSTALS** to the shirt using transfer paper (available at fabric stores) and pen or stylus. Use a Light color transfer paper when transferring onto a black shirt.

Space crystals so they almost touch. Be very careful to make sure they form an even line.

The **SOLID DARK** dots represent critical crystal placement!

There are four crystal placements:

1. Crystals placed **centered over the pattern lines**, like on the outline of the boot and on the boot “stitching” line
2. Crystals placed so **the edge of the crystal is touching the pattern lines**, like in the boot heel and the blade.
3. Crystals placed **between two lines**, like on the sole of the boot.
4. **Crystals indicated by broken lines are estimated placements.** The final placement will depend on where the crystals in the boot outline are placed. Space the 8 “lace hole” crystals evenly along the length **inside** the boot “stitching” line so they almost touch one of the crystals of the boot outline. See the following image.

There are an **EXACT** number of crystals for each of the letters in “AFSC”. **A = 13, F = 19, S = 11, and C = 9**. Place crystals so they touch (NO space between the crystals).
